1. CORPORATE INFORMATION

HighGold Mining Inc. (the 'Company' or 'HighGold') was formed on April 16, 2019 under the laws of British Columbia as a wholly-owned subsidiary of Constantine Metal Resources Ltd. ("Constantine" or the "Parent"). The address of the Company's corporate office and its principal place of business is 320 - 800 West Pender Street, Vancouver, BC, V6C 2V6.

On June 24, 2019, Constantine and HighGold entered into an Arrangement Agreement pursuant to which it was proposed that HighGold would, through a series of transactions, acquire all of Constantine's gold assets, and would itself be acquired by Constantine's shareholders (the "Arrangement"). At the conclusion of the transactions set out in the Arrangement Agreement each Constantine shareholder would hold the same number of Constantine shares as he, she, or it held at the start of the transactions, and one third of that number of HighGold shares.

The Arrangement between Constantine and the Company was completed on August 1, 2019. Under the terms of the Arrangement, Constantine transferred its gold assets to the Company (Note 4), and Constantine shareholders received one common share of the Company for every three common shares of Constantine held. A total of 15,118,075 common shares of the Company were issued pursuant to the Arrangement. Under the terms of the Arrangement, there were also 1,092,892 stock options of the Company issuable to Constantine stock option-holders and 4,901,956 warrants of the Company issuable to Constantine warrant-holders.

The mineral property interests acquired from Constantine were measured at fair value and, as the fair value of the Company's equity issued in exchange was not more readily determinable, and given the exploration stage nature of the assets acquired, fair value was based on their current carrying amounts in the accounts of Constantine, as follows:

		AMOUNT
Johnson Tract Property	$	967,668
Munro-Croesus Property		2,099,902
Golden Mile Property		306,751
Golden Perimeter Property		133,307
Yukon claims		1
	$	3,507,629

The consideration recorded by the Company was allocated as follows:

		AMOUNT
Contributed surplus	$	206,682
Share capital		3,300,947
	$	3,507,629

The allocation to Contributed surplus was based on the estimated aggregate fair value of outstanding Constantine options and warrants converted to option and warrants of HighGold. As all such stock options had previously vested to their holders and substantially all holders were not expected to provide future services to HighGold, the related share-based compensation comprised, in substance, a component of the consideration issued for the property interests rather than a current operating expense of HighGold.

The allocation of $3,300,947 to Share capital reflects solely the residual value associated with the difference between the value of the assets acquired from HighGold and the Contributed surplus figure described above.

HighGold obtained assets and a distribution of shareholders sufficient to facilitate the intended listing of its common shares for trading on the TSX Venture Exchange (“TSX-V”). The Company’s shares are now trading on the TSX-V under the stock symbol “HIGH” and US Over-the-Counter market under the stock symbol “HGGOF”.

In March 2020, the World Health Organization declared a global pandemic related to the virus known as Covid-19. The expected impacts on global commerce are anticipated to be far reaching. To date there have been significant effects on the world’s equity markets and the movement of people and goods has become restricted.

As the Company does not have production activities, the ability to fund ongoing exploration is affected by the availability of financing. Due to market uncertainty, the Company may be restricted in its ability to raise additional funding.

The impact of these factors on the Company is not yet determinable; however, they may have a material impact on the Company's financial position, results of operations and cash flows in future periods. ln particular, there may be heightened risk of mineral property impairment and going concern uncertainty. It is not possible to reliably estimate the length and severity of these developments and the impact on the financial results and condition of the Company and its operations in future periods. These condensed consolidated interim financial statements do not include adjustments to the amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue as a going concern.

2. BASIS OF PREPARATION

a) Statement of compliance

These condensed consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting. These condensed consolidated interim financial statements should be read in conjunction with the Company’s audited consolidated financial statements for the period from inception on April 16, 2019 to December 31, 2019, which have been prepared in accordance with IFRS issued by the IASB.

The policies applied in these condensed consolidated interim financial statements are based on IFRS issued as at May 27, 2020, the date the Board of Directors of the Company approved these financial statements.

b) Basis of consolidation

These condensed consolidated interim financial statements include the accounts of the Company and its wholly owned subsidiaries, Epica Gold Inc. (“Epica”) and JT Mining, Inc. (“JT Mining”) from the effective date of the Arrangement of August 1, 2019. Inter-company balances and transactions are eliminated on consolidation.

c) Basis of measurement

These condensed consolidated interim financial statements have been prepared on a historical cost basis except for the initial measurement of the Arrangement as described in Note 1 and financial instruments classified as financial instruments at fair value through profit or loss, which are stated at their fair value. In addition, these condensed consolidated interim financial statements have been prepared using the accrual basis of accounting except for cash flow information.

These condensed consolidated interim financial statements are presented in Canadian dollars, which is also the Company’s functional currency. The functional currency of Epica and JT Mining is also the Canadian dollar.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a) Judgments and estimates

The preparation of these condensed consolidated interim financial statements requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, revenues and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances and which form the basis of making judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised, if the revision affects only that period, or in the period of the revision and further periods if the revision affects both current and future periods.

- Significant areas requiring the use of estimates relate to the determination of impairment of exploration and evaluation properties, determination of the inputs to the Black Scholes option pricing model, and any required provisions for closure and reclamation.

- A significant judgment made involved the determination that the best representation of fair value in respect to the mineral property interests acquired from Constantine, upon completion of the Arrangement, was their related deferred carrying amounts in the accounts of Constantine.

- Judgment was also involved in the determination that the Company and its wholly-owned subsidiaries shared a common functional currency.

(Expressed in Canadian dollars)

b) Accounting Standards Adopted, or Issued but not yet Effective

The Company adopted no material new accounting standards during its current fiscal year, and is unaware of any applicable, but not-yet-adopted standards that are expected to materially affect the financial statements of future periods.

The following properties were acquired from Constantine pursuant to the Arrangement dated June 24, 2019. As such, all underlying agreements with respect to these properties were assigned to the Company effective August 1, 2019 (Note 1).

a) Johnson Tract Property, Alaska

In May 2019, Constantine completed a definitive agreement (“Agreement”) with Cook Inlet Region, Inc. (“CIRI”) for the lease rights to the 20,942 acre Johnson Tract property located 200 kilometers southwest of Anchorage, in Southcentral Alaska. Commercial terms outlined in the Agreement include a cash payment of US$50,000 due on signing of the Agreement (paid by Constantine), a 10-year lease with a renewal option, and annual lease payments of US$75,000 for years one through five, escalating to US$150,000 from year six onwards, until production is achieved. Under the terms of the Agreement, the Company may exercise its option to maintain the lease rights by incurring US$10 million in expenditures over the first 10 years, inclusive of at least US$7.5 million within the first 6 years (of which US$XXX,XXX [NTD: Insert amount spent since Aug 1 2019] has been incurred. Upon completing such expenditure requirements and satisfying other lease conditions, the Company may renew the lease for an additional 5 years (11 through 15) by making annual lease payments of US$150,000 per year (inflation adjusted) and completing an additional US$10 million in expenditures. The lease rights are subject to CIRI’s “back-in” right to acquire a 15-25% interest in the lease rights, as well as an net smelter returns (“NSR”) royalty on the base metals of 2-3% and a gold NSR ranging from 2.5% to 4.0%, depending on the price of gold at the time.

b) Munro-Croesus Property

The Company has a 100% ownership interest in the Munro-Croesus Property, which is located 90 kilometers east of Timmins, Ontario, and includes the former Munro-Croesus gold mine. There is a 2% NSR payable on the property, of which 0.5% can be purchased by the Company for $1,000,000, with a right of first refusal on the remaining 1.5% NSR. As at March 31, 2020, the Munro-Croesus property consists of 15 patented mining claims and leases and two staked claims.

c) Golden Mile Property

In December 2016, Constantine completed the acquisition of 100% of the Golden Mile property, comprised of 32 claims in the Porcupine Mining Division in northern Ontario, Canada. There is a 3% NSR payable to the previous owners to Constantine of the property, of which 1/3 of the NSR may be purchased by the Company at any time for $1,000,000. The Company must also make annual advance royalty payments of $10,000, which are deductible from future NSR payments.

d) Golden Perimeter Property

As of December 15, 2018, Constantine entered into an agreement to acquire the Golden Perimeter property, comprised of 561 claims located in the Porcupine Mining Division in northern Ontario, Canada. In order to continue to maintain the option and acquire the Golden Perimeter property, the Company must make cash payments totaling $65,000 ($20,000 paid) and issue 100,000 of its shares over the remaining three year period of the agreement. Upon completion of the full purchase price of cash and shares, the Company will make annual advance royalty payments of $10,000, commencing on December 15, 2024 and each year thereafter, until commercial production commences. There is a 2.5% NSR on the property, of which 1.0% can be purchased by the Company at any time for $750,000. The Company will retain the right of first refusal on the remaining 1.5% NSR.

e) Yukon Land Position and Joint Venture

The Company holds a 50% interest in a joint venture with Carlin Gold Corporation ("Carlin") which controls over 3,000 claims in the Mayo and Watson Lake Mining Districts, Yukon. The claims are distributed in twelve blocks that total approximately 65,000 hectares (250 square miles).

Mineral Property Option Agreement with Fireweed Zinc Ltd. ("Fireweed")

Under the auspices of the Constantine Carlin Joint Venture ("CCJV"), in May 2017 Constantine entered into a mineral property option agreement granting Fireweed an option to purchase a 100% interest in three properties totaling 624 claims in the Mac Pass area, Yukon. The subject claims were staked under the CCJV, and all remaining option payments and royalties from the Fireweed option agreement are to be split between the Company and Carlin.

Total consideration for Fireweed to acquire a 100% interest in the properties includes the payment of an aggregate of $500,000 in cash and the issuance of 300,000 common shares in the capital of Fireweed, over three years, of which $200,000 cash and 100,000 common shares of Fireweed have been paid to Constantine and Carlin. The Company is entitled to receive $150,000 cash and 100,000 common shares of Fireweed under the remaining terms of the option agreement.

Under the terms of the agreement with Fireweed, NSR rights will be retained by the Company and Carlin, consisting of a 0.5% NSR on base metals and silver and a 2.0% NSR on all other metals. An additional payment of $750,000 will be payable to the CCJV members upon Fireweed producing an indicated resource of 2.0 million tonnes on the optioned properties.

5. DUE TO CONSTANTINE METAL RESOURCES LTD.

At December 31, 2019, the Company owed $211,127 to Constantine for Company expenditures that were paid by Constantine on behalf of the Company. The debt was repayable on demand, with no interest or specific terms of repayment.

During the three months ended March 31, 2020, the Company repaid the amounts owing to Constantine in full.

6. SHARE CAPITAL

The Company has authorized share capital of an unlimited number of common shares and preferred shares without par value. Disclosures on any shares issued are provided in the Statements of Changes in Shareholders' Equity. Common and/or preferred shareholders are entitled to receive dividends if and when declared by the Directors.

On August 2, 2019, the Company issued 15,118,075 common shares valued at $3,300,947 to the shareholders of Constantine pursuant to the Arrangement in relation to the acquisition of various gold assets (Notes 1 and 4). A total of 165,791 of these shares were escrowed at the date of issuance, subject to the standard escrow policies of the TSX Venture Exchange regarding shares issued to directors and officers.

On August 19, 2019, the Company completed a $200,000 private placement consisting of 1,000,000 units of the Company at a price of $0.20 per unit. Management of Industry and Financial Risk

The Company is exposed to various risks in relation to financial instruments. The Company's risk management is coordinated at its head office in Canada in close cooperation with the board of directors and focuses on actively securing the Company's short to medium-term cash flows and raising finances for the Company's capital expenditure program. The Company does not actively engage in the trading of financial assets for speculative purposes. The most significant financial risks to which the Company is exposed are described below.

a) Credit risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfil its payment obligations. The Company limits its exposure to credit loss for cash by placing its cash with high quality financial institutions and for trade receivables by performing standard credit checks. The credit risk for cash is considered negligible since the counterparties are reputable banks with high quality external credit ratings.

b) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations when they become due. The Company ensures, as far as reasonably possible, that it will have sufficient capital in order to meet short-term business requirements, after taking into account cash flows from operations and the Company's holdings of cash. As at March 31, 2020, the Company has working capital of $11,317,152 (December 31, 2019 - $11,584,069). There can be no assurance that the Company will be successful with generating and maintaining profitable operations or will be able to secure future debt or equity financing for its working capital and expansion activities.

c) Foreign exchange risk

The Company operates internationally and is exposed to foreign currency risk arising from currency exposures to Canadian dollars. The main currency to which the Company has an exposure is the U.S. dollar. The Company is exposed to currency risk to the extent of its cash and trade and other payables that are denominated in U.S. dollars. The Company does not hedge its exposure to fluctuations in the related foreign exchange rates. The Company's exposure to currency risk is currently considered insignificant.

d) Interest Rate Risk

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Company does not hold any assets or liabilities subject to variable interest rates, and as such, the Company is not exposed to significant interest rate risk.

9. CAPITAL DISCLOSURES

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the development and expansion of its business and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk level.

The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust its capital structure, the Company may attempt to issue new shares or debt, dispose of assets, or adjust the amount of cash and cash equivalents. There can be no assurance that the Company will be able to obtain debt or equity capital in the case of operating cash deficits

In order to facilitate the management of its capital requirements, the Company prepares expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions. The Company does not pay out dividends in order to conserve cash reserves and to maximize ongoing exploration efforts. The Company's share capital is not subject to external restrictions. The Company has not paid or declared any dividends since the date of incorporation, nor are any contemplated in the foreseeable future.

(Expressed in Canadian dollars)

The Company is not subject to externally imposed capital requirements as at March 31, 2020 except when the Company issues flow-through shares for which the amount should be used for exploration work. On December 5, 2019, the Company completed a flow-through private placement totalling $2,304,000. As at March 31, 2020, the Company incurred $757,444 (December 31, 2019 - $128,889) in eligible exploration and evaluation expenditures and consequently the Company has the obligation to incur a remaining balance of $1,546,556 (December 31, 2019 - $2,175,111) in exploration and evaluation expenditures no later than December 31, 2020.
